EDUCATION

- 2018 – current | PhD student in Computer Science, Federal University of Minas Gerais, Brazil.
- 2018 | MSc. degree in Computer Engineering, Federal University of Technology – Paraná, Brazil.
Thesis: *An Efficient Strategy for Estimation of Visually Salient Regions in Images*
- 2016 | B.E. degree in Computer Engineering, Federal University of Technology – Paraná, Brazil.
Thesis: *A Platform for Development of Analytical Telerobotics*

PROFESSIONAL EXPERIENCE

Samsung R&D Institute, Brazil

- 2022 – current | Senior Researcher at the AI R&D Lab. Research and development of AI solutions for health applications.

Federal University of Minas Gerais, Brazil

- 2021 – 2022 | Research assistant. Data analysis of geophysical data for stratigraphic modeling, under a project for the Brazilian Petroleum Corporation — *Petrobras*.
- 2019 – 2021 | Research assistant. Research and development in visual pattern recognition, focused on biometrics for surveillance, under a project for the Brazilian Petroleum Corporation — *Petrobras*.
- 2018 – 2019 | Research assistant. Research and development in visual pattern recognition, focused on video analytics for vehicle cabin monitoring, under a project for *Maxtrack*.
- 2018 – current | PhD student at the *Smart Sense Laboratory*. Research and development in visual pattern recognition for forensics and biometrics.

Federal University of Technology – Paraná, Brazil

2016 – 2018	Master's student at the <i>Imaging and Electronic Instrumentation Laboratory</i> , with a fellowship from the Brazilian Coordination for the Improvement of Higher Education Personnel (CAPES). Research on perception-based algorithms for accelerating computer vision tasks.
2014 – 2015	Undergraduate research assistant at the <i>Imaging and Electronic Instrumentation Laboratory</i> , with a fellowship from the Araucária Foundation. Research on perception-based algorithms for accelerating computer vision tasks.
2013 – 2014	Undergraduate research assistant, with a scholarship from the Brazilian National Council for Scientific and Technological Development (CNPq). Research on the optimization of a discrete event simulation software library.
2012 – 2013	Undergraduate research assistant. Development of a microcontrolled biomedical system for infusion pump calibration.

LANGUAGES

Portuguese Advanced reading, writing and speaking. Native proficiency.

English Advanced reading and writing, fluent speaking. TOEFL ITP Test score (2014): 670/677. Proficient User/Effective Operational Efficiency according to the Common European Framework of Reference for Languages (CEFR).

PROFESSIONAL SERVICE

Journal Reviewer

2023 – current	Multimedia Systems (Springer Nature)
2023 – current	PLOS One
2023 – current	IET Computer Vision
2023 – current	IEEE Sensors
2022 – current	IEEE Transactions on Neural Networks and Learning Systems
2021 – current	IEEE Transactions on Image Processing
2019 – current	IEEE Transactions on Information Forensics and Security
2019 – current	The Visual Computer (Springer Nature)

Conference Reviewer

2023	Brazilian Conference on Intelligent Systems (BRACIS)
2022	IAPR International Conference Pattern Recognition
2021	IEEE International Conference on Automatic Face and Gesture Recognition
2020 – 2023	IEEE Winter Conference on Applications in Computer Vision
